

# ■ Crop Disease Report

**Disease: Leaf Blight**

Confidence: 95.00%

## ■ Recommended Solutions:

- Remove and destroy infected leaves.
- Apply fungicide spray every 7-10 days.
- Ensure proper spacing between plants for airflow.
- Water plants at the base to avoid wetting the leaves.
- Use a fungicide that is effective against leaf blight.
- Remove any debris from the garden to reduce the risk of infection.
