

■ Crop Disease Report

Disease: Leaf Blight

Confidence: 95.00%

■ Recommended Solutions:

- Remove and destroy infected leaves.
- Apply fungicide spray every 7-10 days.
- Ensure proper spacing between plants for airflow.
- **Watering: Water plants deeply and regularly to keep soil moist.**
- **Pruning: Prune plants regularly to remove dead or damaged leaves.**
- **Soil: Use well-draining soil to prevent waterlogging.**
